151. UPDATE ON PROGRESS WITH THE COUNCIL'S ICT & DIGITAL STRATEGIES

*(Cllr Huntley arrived at the meeting at 18:02pm)*

The Head of Technology and Digital provided members with an overview of his report where he highlighted that over the last two years there had been an unprecedented increase on the reliance of technology particularly around remote working and the adoption of digital services. Excellent progress had been made with improving the underlying technical infrastructure as well as advancing the councils customer facing digital channels. The council's website had seen a significant increase in visitor numbers and more recently achieved its one millionth customer visit. At the same time the team had made improvements to the usability and accessibility of the

site and provided more targeted content, which enabled customers to get to the right place much quicker. He also confirmed that the council's cloud first strategy was also progressing well, confirming that the council's reliance on in-house infrastructure had been reduced by about a third. In summing up he explained that the internal support team, even when faced with the pandemic had managed to exceed their service targets despite experiencing covid themselves.

The Chair then took questions from members where several points were raised, and answers were provided. Three members raised concerns regarding the recent changes that had been reported regarding reception areas at the Civic Centre and Bognor Regis Town Hall. It was confirmed by the Group Head of Operation Excellence that both sites are open to the public and the changes implemented were to provide a more streamlined customer experience. She confirmed that customers would still be able to meet with officers on a face-to-face basis should that be what they want.

The Committee

RESOLVED

1. Note the report received and continue to receive annual updates.

152. WORK PROGRAMME

The committee noted its work programme.
