

# ARUN DISTRICT COUNCIL

## CAPITAL STRATEGY 2023/24 TO 2027/28

### 1. Introduction

#### Overview

- 1.1. CIPFA's Prudential Code requires Councils to have a capital strategy. The Code states that "In order to demonstrate that the authority takes capital expenditure and investment decisions in line with service objectives and properly takes account of stewardship, value for money, prudence, sustainability and affordability, authorities should have in place a capital strategy that sets out the long-term context in which capital expenditure and investment decisions are made and gives due consideration to both risk and reward and impact on the achievement of priority outcomes.

#### Objectives

- 1.2. The purpose of the strategy as per the Code is that it is "intended to give a high-level overview of how capital expenditure, capital financing and treasury management activity contributes to the provision of services, along with an overview of how associated risk is managed and what the implications might be for future financial sustainability."
- 1.3. The Council must demonstrate that it takes capital expenditure and investment decisions in line with service objectives and properly takes account of stewardship, value for money, prudence, sustainability and affordability giving due consideration to both risk and reward and the impact on outcomes.
- 1.4. The strategy aims to balance capital expenditure needs and expectations (e.g. replacement of business critical IT systems) with the scarcity of available resources to enable the identification and optimisation of all sources of capital funding and also be flexible enough in order to respond to emergencies and changes in priorities:
- 1.5. It is a collective document involving various departments within the organisation. It is not purely a finance function. All the relevant officers should review this document from time to time and it be updated

### 2. Capital Strategy Framework

#### How do existing strategies feed into the Capital Strategy

- 2.1. The strategy maintains a strong and current link to the council's priorities and to other key strategy documents as shown below:

## Strategic Direction of the Council

2.2. The Council has implemented its strategic direction for the next four years “Our vision: a better future 2022 to 2026”. This is based around four key themes which will set our priorities and guide our decision making for the next four years, building on the good things that we already do and improving where they could be better.

- Improving the wellbeing of Arun
- Delivering the right homes in the right place
- Supporting our environment to support us
- Fulfilling Arun’s economic potential

## 3. Capital Strategy

### Scope

3.1. Capital expenditure is strictly defined and is principally expenditure incurred in buying, constructing or improving assets such as land, buildings, vehicles, plant, machinery and intangibles (e.g. computer software). It also includes grants and advances to be used for capital purposes, such as Disabled Facility Grants.

- 3.2. The Council's policy on capitalisation in accordance with its approved accounting policies and procedures, is that expenditure on land, buildings, vehicles, plant, machinery and intangibles over £25,000 will be capitalised. Expenditure under these limits is deemed to be a revenue cost.

**The Capital Strategy sets out the Council's approach to:**

- **working with partners**
- **asset management planning**
- **risk appetite**
- **governance and decision making**
- **capital financing & affordability**
- **managing borrowing**
- **monitoring & project evaluation**
- **capital investment in 2023/24 to 2027/28**

### **Working with Partners**

- 3.3. Given the financial challenges faced by the Council it is particularly important that it works closely with regional and local authority partners to deliver investment across the district which otherwise would neither be deliverable nor affordable. Whether this is through central government grants and town council contributions or through delivering schemes in partnership with West Sussex County Council.

### **Asset Management Planning**

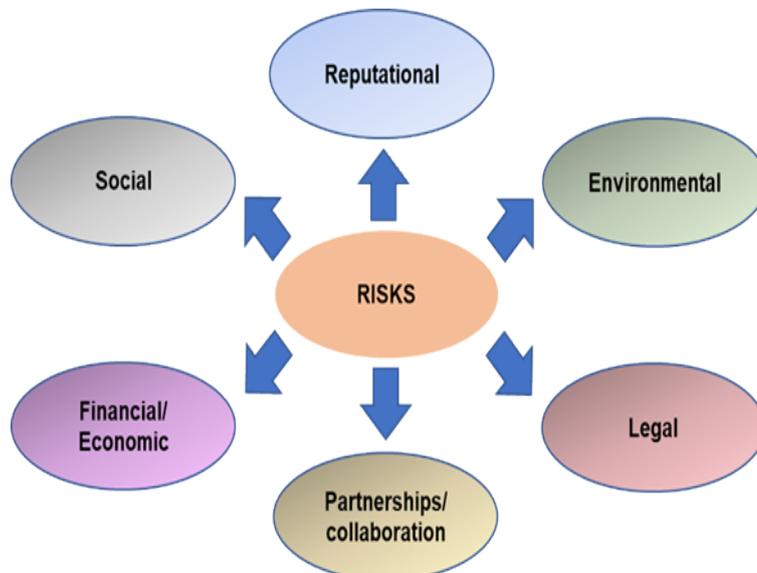

- 3.4. The Council has responsibility for a range of assets. The asset management strategy establishes the priorities for asset management planning. It is essential to understand the need, utilisation, condition, income generating potential and the investment and operating cost requirements of assets, whether owned or leased.
- 3.5. The core asset management programme which deals with General Fund assets is now supplemented with additional budget as a result of a review in 2019 of the condition of the Council's General Fund assets. This revealed that after years of under investment that significant funding would be required to ensure that they are maintained at an acceptable standard to allow the Council to continue to deliver its services.
- 3.6. The Housing Revenue Account (HRA) business plan looks at the expenditure requirements over the next 30 years.

## Property Investment Strategy

- 3.7. This strategy sets out the policies relating to the Property Investment Fund which aims to generate a return for the Council through property acquisitions. These are funded by earmarking a proportion of the Council's capital receipts from land and property disposals. Acquisitions can only be made once a full business case has been completed and the risks fully understood and evaluated. Further details are set out in the Arun District Council Property Investment Strategy 2017–2022 as amended by Cabinet 13 January 2020.
- 3.8. The strategy will be reviewed and updated during 2023/24 as it has expired but is likely to be replaced by an Income and Commercialisation Strategy.

## Risk Appetite

- 3.9. Any new proposed capital scheme should be supported by a sound business case/options appraisal and should include a full evaluation of risk:

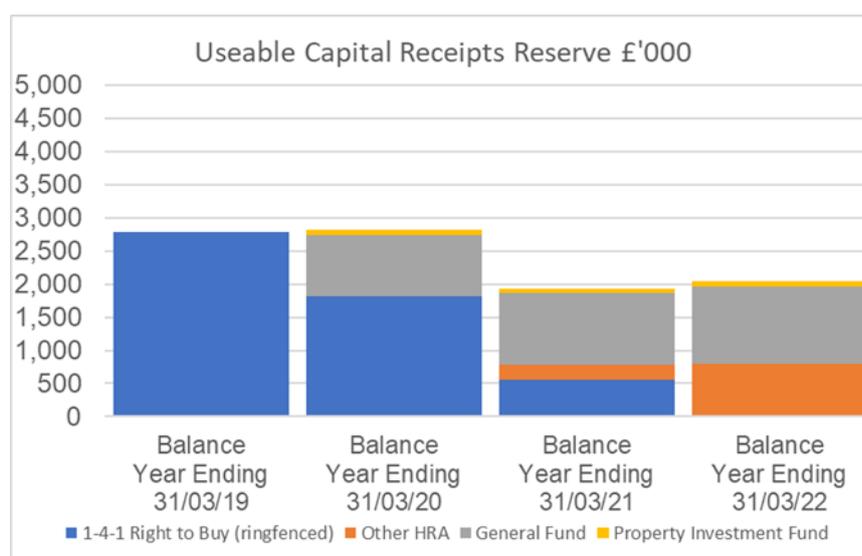

- 3.10. This should have regard to the whole life costing methodology, “the systematic consideration of all relevant costs and revenues associated with the acquisition and ownership of an asset.” In practical terms this means that any appraisal will need to consider not just the initial outlay but all costs/income associated with the project that are likely to occur in future years, including possible replacement. This is vital to ensure that the Council is not committing itself to future liabilities that are unsustainable.

## Governance and Decision Making

- 3.11. It is important that those charged with governance understand the long-term context in which investment decisions are made and the financial risks to which the Council is exposed. The strategy should therefore contain sufficient detail to allow members to understand how stewardship, value for money, prudence, sustainability and affordability will be achieved.

- 3.16. Grants and developer contributions are generally used to fund specific capital schemes linked to the conditions imposed by the relevant grant or contribution. There is little, if any, latitude in the way grant funding can be applied.
- 3.17. Capital receipts are derived from the sale of the Council's assets, including council houses sold under the Right to Buy. It is the Council's policy to use these receipts (with the exception of "1 for 1" Right to Buy receipts which can only be used for the provision of new social housing) to support the General Fund capital programme. A specified proportion of General Fund receipts are earmarked for the Property Investment Fund.
- 3.18. It should be noted that other than right to buy receipts there are very little opportunities for capital receipts. Asset disposals are infrequent and although there are a few assets which have been identified as possible disposals the process can take years.
- 3.19. The graph below shows how the levels of useable capital receipts have reduced over the last few years as a result of being applied to fund capital expenditure.

- 3.20. The Council has identified a significant budget gap for 2023/24 which is balanced through the use of reserves. Revenue contributions have in the past been used as a flexible source of funding. This practice will no longer continue as this places an immediate strain on the General Fund balance and HRA balance.
- 3.21. The Council has made the decision to borrow for General Fund capital expenditure as well as HRA capital expenditure in future once other sources of capital financing like capital receipts have been applied. Borrowing spreads the cost over a number of years. Loan servicing costs and the overall level of debt exposure both need to be considered and clearly flagged in a business case.

## **Managing Borrowing**

- 3.22. With the exception of the PWLB loan taken out on the inception of self-financing of the HRA at the end of the previous subsidy system, the Council currently has no external debt. The expenditure on HRA stock development not funded from 1-4-1 receipts will require external borrowing. The Council has reviewed its borrowing policy and will allow borrowing for all HRA and GF capital expenditure.

## **Invest to Save**

- 3.23. Invest to save is the investment now to transform and reshape services to reduce running costs/generate efficiency savings or earn income to payback the initial outlay. Priority should be given to these projects providing they are supported by a sound business case and financial appraisal.
- 3.24. A good example would be investment in new beach huts, as there is a demand for beach huts (supported by a waiting list). The initial outlay to build new huts would be recovered over a period of years through the rental these would generate.

## **Leasing**

- 3.25. Leasing obligations are similar to borrowing as they have an ongoing revenue budget commitment. Leasing will be considered following due diligence over the life of the asset, comparing the financial and non-financial benefits and risks compared to the Council owning such asset itself.
- 3.26. From 1 April 2024 the accounting standard which sets out the guidelines for recognising and disclosure requirements for accounting for leases changes from IAS 17 (International Accounting Standard) to IFRS 16 (International Financial Reporting Standard). This means from this date the way the Council accounts for assets it leases will change. The Council may adopt the standard before this date if it so wishes.
- 3.27. The definition of a lease has been adapted for the public sector as being 'a contract, or part of a contract, that conveys the right to use an asset for a period of time.'
- 3.28. The Council currently leases such things as land, buildings, vehicles and photocopiers.
- 3.29. Under these changes these right of use assets will be shown on the balance sheet except for leases of 12 months or less or if the asset is of low value. The accounting standard does not include intangible assets (e.g. computer software licences) or where a contract contains use of an asset but the supplier has the ability to substitute alternative assets throughout the period (e.g. hygiene bins).

- 3.30. When the asset is recognised in the balance sheet a corresponding liability is then created, representing the obligation to make lease payments. When the Council makes a lease payment rather than it showing as an expense against the relevant cost centre, it is split between paying off this liability and interest payments. The asset is depreciated in the same way as similar assets of that class, usually over the life of the lease unless the asset useful life is lower.
- 3.31. Separate provision for leases at peppercorn, nominal or nil consideration is based on donated asset accounting.
- 3.32. In preparation a data gathering exercise has already been undertaken to record all the leases the Council has, including those at peppercorn/nil consideration (where the Council pays little or no rental payments at any point during the duration of the lease). The Council has had to evidence to its external auditors that it is prepared for these changes. The Council's accounting policies will be amended to reflect the move to IFRS 16 and the threshold for low value will be determined when the standard is implemented.
- 3.33. Finance should be consulted on all new leases and contracts which include the use of an asset (whether this is directly by the Council or by the contractor to deliver obligations under the contract so that it can be assessed to see if the contract contains an embedded lease.

### **Treasury Management**

- 3.34. Treasury Management is the management of the Council's borrowing, investments and cashflows and is essential in particular when accessing the affordability of a capital project, the Treasury Management Strategy includes:
- The incremental impact of capital investment on council tax and housing rent values
  - The borrowing strategy
  - The authorised limits for external debt
- 3.35. Where capital expenditure has been incurred without a resource to pay for it, this will increase the Council's Capital Financing Requirement (CFR) which is the Council's underlying need to borrow. The Council is required to make a prudent provision for the repayment of historic capital expenditure from its revenue budget. This is known as minimum revenue provision (MRP). CFR is calculated below:

Opening CFR
+
Capital expenditure for the year
-
Grants, contributions, reserves, capital receipts
-
Minimum Revenue Provision and Voluntary Provision
=
Closing CFR

### **Monitoring and Project Evaluation**

- 3.36. It is the responsibility of the relevant budget holder and their team to manage costs and to provide explanations for any variations from the approved budget. Budget monitoring statements are presented to Corporate Management Team and Policy and Finance Committee quarterly.
- 3.37. Major capital projects will have a designated project board who will have regular meetings throughout the project. The board will have representation from across the Council including Finance. These are to discuss project progress, including cost projections.
- 3.38. A post project evaluation is required to be undertaken to measure delivery against required project outcomes, not just time and cost. It is again the responsibility of the budget holder to undertake this review. This will help Council for the future as lessons learned can be transferred to new projects and help with such things as benchmarking.
- 3.39. All major projects are reported to the Corporate Management Team Project Board which meets monthly to ensure that risk is managed effectively.

## **4. Capital Investment 2023/24 to 2027/28**

### **HRA and General Fund Capital Programmes**

- 4.1. The Housing Revenue Account (HRA) is a statutorily ring-fenced account covering income and expenditure relating to the Council's rented stock and the General Fund covers all other Council services. This ring-fence means that the HRA and the General Fund are completely separate entities, each having their own budget and financial model. For these reasons the HRA and General Fund capital programmes are considered separately in the following sections.

## **Housing Revenue Account (HRA) Programme**

### **Stock Development**

- 4.2. The HRA capital programme for 2023/24 to 2027/28 which is driven by the updated HRA Business Plan (presented to Housing and Wellbeing Committee on 25 January 2023), will be approved by Full Council on 1 March 2023. One of the key priorities of this plan is the provision of 250 new dwellings over a 10 year period, the acquisition/building of these dwellings funded from a mix of “1 for 1” Right to Buy receipts and borrowing. Right to buy receipts are retained by agreement with the Government subject to them being used for the provision of new social housing within five years of receipt. These can be used to fund up to 40% of the cost of acquisition/new build schemes, whilst the Council has to fund the remaining 60%.
- 4.3. A number of acquisition/new build schemes have already been delivered with new schemes currently progressing.

### **Housing Repairs and Improvements**

- 4.4. The updated HRA Business Plan reflects a substantial increase in the levels of investment required in the existing housing stock including statutory compliance which is heavily regulated.
- 4.5. This expenditure is a combination of revenue and capital. The capital includes boiler, kitchen and bathroom replacement programmes as well as reroofing and rewiring.

### **Other Expenditure**

- 4.6. There are plans to redevelop the sheltered housing stock and therefore additional capital expenditure has been included in the budget from 2023/24 for three years. This is subject to a full feasibility having been undertaken.

### **Affordability, borrowing and the abolition of the HRA debt cap**

The HRA capital programme will need to be regularly reviewed to assess affordability. In particular, consideration will need to be given to the loan servicing costs of any new borrowing to ensure that these costs, together with the costs associated with existing (self-financing) debt can be sustained. This is particularly important in the light of reducing number of right to buy disposals. The “1 for 1” Right to Buy receipts being used to part-fund current acquisition/new build schemes are not being replaced by new receipts and there will therefore be insufficient receipts to support future schemes.

## **General Fund Programme**

### **Core and Enhanced Programme**

- 4.7. The Council has a core annual programme comprising of Disabled Facilities Grants (DFGs) – these grants pay for essential adaptations to help people with disabilities stay in their own homes. The DFG programme is entirely funded by a Better Care Fund Government Grant.
- 4.8. In addition, the Council also has an enhanced programme of expenditure which is based on the additional requirements for the year, expenditure will likely be more of a capital nature. The expenditure includes:
- Asset management – a programme of larger one-off projects, which will be capital expenditure; for instance a schedule of public convenience refurbishments.
  - Play areas – a programme of play area replacements. Most expenditure is capital and is funded from a combination of external funding, capital receipts, developers' contributions and revenue.
  - ICT – the replacement of business-critical systems over a period of 5 years which is normally the useful life of software
  - Other one offs – for instance replacement of life expired vehicles, plant and equipment, regeneration projects.
- 4.9. The key issue with the enhanced programme is the uncertainty with regard to future funding levels. The Council's Medium-Term Financial Strategy (MTFS) recognises that capital investment needs to be carefully prioritised due to the limited amount of Council resources.
