SDP1	Major applications determined in 13 weeks	Planning	Councillor Martin Lury	Karl Roberts - Director of Place	Quarterly	Higher is better	80%	71.43%	81.25%	The council uses 'extensions of time' agreements with applicants to ensure that decisions are made within agreed time limits. In reporting performance, government guidance allows for these agreements to be used so that decisions are issued within time. When taking the use of these agreements into consideration the councils performance was 13 out of 16 or 81.25% (over the 2 quarters). This performance is below the targets set. Whilst securing an extension of time is important in terms of complying with national performance targets, it is also important that the underlying performance improves in order to reduce overall determination times. The Area Teams are fully staffed at present (allowing for the use of temporary agency staff) and so a gradual improvement in performance should now occur. The figures included here are cumulative and include Q1 and Q2 together.	Overachieving	88.24%	The council uses 'extensions of time' agreements with applicants to ensure that decisions are made within agreed time limits. In reporting performance, government guidance allows for these agreements to be used so that decisions are issued within time. When taking the use of these agreements into consideration the councils performance was 30 out of 34 or 88.24% (over the 3 quarters). This is a big improvement on the previous quarter after Team Leaders were reminded of performance in PDR's. When not taking these agreement s into consideration and just providing raw data on timescales, the Council's performance on these applications was 2 out of 34 or 5.88% determined in 13 weeks. This performance is above the targets set. Whilst securing an extension of time is important in terms of complying with national performance targets, it is also important that the underlying performance improves in order to reduce overall determination times. The Area Teams are fully staffed at present (allowing for the use of temporary agency staff) and so a gradual improvement in performance should now occur.	100%	Q4 data: 9 applications received and 9 determined within 13 weeks. The Council uses 'extensions of time' agreements with applicants to ensure that decisions are made within agreed time limits. In reporting performance, government guidance allows for these agreements to be used so that decisions are issued within time. When taking the use of these agreements into consideration the Councils performance was 39 out of 43 or 90.70% (over the 4 quarters). When not taking these agreement s into consideration and just providing raw data on timescales, the Council's performance on these applications was 3 out of 43 or 6.98% determined in 13 weeks. This performance is above the targets set. Whilst securing an extension of time is important in terms of complying with national performance targets, it is also important that the underlying performance improves in order to reduce overall determination times. The Area Teams are fully staffed at present (allowing for the use of temporary agency staff) and so a gradual improvement in performance should now occur. The performance demonstrates that we are using Extensions of Time correctly when taking decisions on major applications and that the emphasis on securing them is a message that has been actioned by the staff.	Over achieved	No further CMT comment required to the positive commentary and return detailed	No comparable data available
SDP2	Minor applications determined in 8 weeks	Planning	Councillor Martin Lury	Karl Roberts - Director of Place	Quarterly	Higher is better	90%	85.94%	80.95%	The council uses 'extensions of time' agreements with applicants to ensure that decisions are made within agreed time limits. In reporting performance, government guidance allows for these agreements to be used so that decisions are issued within time. When taking the use of these agreements into consideration the councils performance was 102 out of 126 or 80.95% (for the two quarters). This performance is below the targets set. Whilst securing an extension of time is important in terms of complying with national performance targets, it is also important that the underlying performance improves in order to reduce overall determination times. The Area Teams are fully staffed at present (allowing for the use of temporary agency staff) and so a gradual improvement in performance should now occur. The figures included here are cumulative and include Q1 and Q2 together.	Not achieving	83.51%	The Council uses 'extensions of time' agreements with applicants to ensure that decisions are made within agreed time limits. In reporting performance, government guidance allows for these agreements to be used so that decisions are issued within time. When taking the use of these agreements into consideration the Council's performance was 162 out of 194 or 83.51% (for the three quarters). When not taking these agreement s into consideration and just providing raw data on timescales, the Council's performance on these applications was 28 out of 194 or 14.43% determined in 8 weeks. This performance is marginally below the targets set but is an improvement from Q2. Whilst securing an extension of time is important in terms of complying with national performance targets, it is also important that the underlying performance improves in order to reduce overall determination times. The Area Teams are fully staffed at present (allowing for the use of temporary agency staff) and so a gradual improvement in performance should now occur.	87.30%	Q4 data: 63 applications received and 55 determined within 8 weeks. The Council uses 'extensions of time' agreements with applicants to ensure that decisions are made within agreed time limits. In reporting performance, government guidance allows for these agreements to be used so that decisions are issued within time. When taking the use of these agreements into consideration the Council's performance was 216 out of 255 or 84.71% (for the four quarters). When not taking these agreement s into consideration and just providing raw data on timescales, the Council's performance on these applications was 35 out of 255 or 13.73% determined in 8 weeks. This performance is marginally below the targets set but is an improvement from Q2. Whilst securing an extension of time is important in terms of complying with national performance targets, it is also important that the underlying performance improves in order to reduce overall determination times. The Area Teams are fully staffed at present (allowing for the use of temporary agency staff) and so a gradual improvement in performance should now occur. This data demonstrates that case management needs to be improved so that Extensions of Time are secured before decisions are issued. SDP4	Occupied retail units in Littlehampton	Economy	Councillor Dr James Walsh	Karl Roberts - Director of Place	6 Monthly	Higher is better	90%	No data required	92%	On-line shopping continues to grow at the expense of town centre retail. Vacancy rates in Littlehampton remains fairly low, but some key sites remain empty (e.g. HSBC, Waitrose, Natest)	Over achieving		No data required	90.43%	Q4 data: 188 properties and 170 occupied. Downturn in retail has resulted in increased closures over the past 12 months, with 4 sizeable units in Littlehampton town centre as vacant. There is interest in a number of the vacant sites, but slower than normal in occupancy.	Over achieved	No further CMT comment required to the positive commentary and return detailed	2017/18: 92% 2016/17: 93% 2015/16: 94% 2014/15: 93% 2013/14: 94%
SDP6	Vacant private sector dwellings returned to occupation	Technical Services	Councillor Matt Stanley	Karl Roberts - Director of Place	Annually	Higher is better	25	No data required		No data required			No data required	82	Exceeded target and achieved through informal advice and guidance but also effective enforcement work and persistent monitoring to ensure properties are brought back into use.	Over achieved	No further CMT comment required to the positive commentary and return detailed	2017/18: 49 2016/17: 40 2015/16: 20 2014/15: 30 2013/14: 17
SDP7	The total income received from general fund assets	Technical Services	Councillor Matt Stanley	Karl Roberts - Director of Place	Annually	Higher is better	£600K	No data required		No data required			No data required	£1,011,791.71	In 18/19 core general fund asset income was ahead of target at 700k. In addition, an additional £311k in non-core general asset income was received which will be included in the reported figures in future years against an adjusted target of £1m.	Over achieved	No further CMT comment required to the positive commentary and return detailed	No comparable data available
SDP9	Licence applications determined within the various statutory or service time limits	Technical Services	Councillor Matt Stanley	Karl Roberts - Director of Place	Quarterly	Higher is better	90%	Data not available	Data not available	This software needed to produce this information has now gone live, and the data extract report has been successfully set up in the new system. However, the migrated data does not include one of the dates needed to produce the performance indicator. This is because there was no corresponding field in the old EHADD database. To go back through six months' licence applications (which will be over 200 applications) would take an administrative officer a number of days to undertake. There is no spare capacity in the team and it is considered better use of their time to ensure statutory deadlines for determining applications being received now are met, than it is to divert resource to find the information to populate this performance indicator. We will be able to provide figures for applications received in the third quarter.	No data	79.16%	475 applications received and 376 determined within the statutory or service time limits. A new animal licensing regime introduced in October has resulted in a massive increase in workload for the team. An additional post funded by the additional fee income has been agreed to provide necessary capacity and an officer should be in post by end of February 2019. Excluding the animal licensing applications the figure is 89% determined within time limits. Capacity to deal with these has also been impacted by the animal licensing work and secondment of experienced staff to support implementation of a new software system. Of the 11% (non-animal licence applications) not determined within time limits: 13 applications have not been determined due to lack of capacity, 5 applications were determined out of time due to the applications being invisible missing from view due to a system migration issue, and 1 application still has fees outstanding so cannot be determined.	91.80%	Q4 data: 393 applications received and 363 determined within statutory or service time limits. The target for this quarter indicates a slight increase. However there are still deadline failures affecting this indicator; these include Officers still undertaking clearing the backlog of animal inspections. Significant progress is being made in this area, however it will be sometime yet before the task is complete. Two Officers are required currently to undertake such inspections and planning is required to ensure availability around other duties such as complaints investigation, report writing and committees. This has also impacted on the ability to be able to inspect tattooing and piercing premises resulting in a failure. The remainder of applications had been determined but paperwork had not been issued as there is insufficient resource to deal with workload until such a time as we see the full functionality of the new software available. It is noted there has been a very significant improvement in results now we have greater resources to hand.
