

## Guide to new performance measure tables

<b>Measure</b>	Brief description of each performance measure
<b>ADC quartile</b>	<p>This is taken from our Housemark subscription. The number in bold and a background colour displays which quartile our last submission places us in, with Quartile 1 (green colour) being the top performing position and Quartile 4 (red colour) being the lowest performing position.</p> <p>Also in this box is the figure we provided in our last submission that determined the quartile position</p>
<b>Upper quartile</b>	This shows what figure we'd need to achieve to get into quartile 1 (based on last submission information) and is also the current target for this measure.
<b>Previous performance</b>	This is our previous performance data – usually the total value for a quarter but for some measures this is the value at the end of the period
<b>Current performance</b>	This is our most recent performance data – usually the total value for a quarter but for some measures this is the value at the end of the period
<b>Direction</b>	<p>Will show red or green arrows in an upward or downward direction to show the difference between our current and previous performance.</p> <p>The direction of the arrow shows whether the current performance figure is higher or lower than previously, the colour indicates whether that direction is positive or negative.</p>
<b>RAYG status</b>	<p>Red, Amber Yellow, and Green colours to show which quartile our latest performance figure would put us in, if we compared current performance against last Housemark submission information</p> <p>For the Homeless and Housing Need table, the colour relates to the Vision target</p>
<b>Trendline</b>	Visual display of the recent trajectory of each measure over the last 4-month period (where applicable)
<b>Data source</b>	Location of the measure. Most measures will be data that we extract from a relevant housing system, some come from survey data and others from Housemark or government tables
