

Sussex
Clinical Commissioning Groups

Presentation for Arun District Council.

OSC Meeting 14 January 2020

Content

- Introductions to the team
- CCG Overview
- Primary Care Services - access & provision
- Primary Care Premises – developments & plans
- CCG strategic estate plan for Arun
- Littlehampton, Bognor Regis, Zachary Merton Hospital
- Mental Health Services
- Support for patients with communication needs

CCG Overview (1)

- CCG commissioning responsibilities.
 - commissioning healthcare services to meet the reasonable needs of the persons for whom they are responsible (patients registered with member practices, unregistered patients living in the area)
 - commissioning emergency and urgent care, including ambulance services and out-of-hours services, for anyone present in their area.
 - Some services are the responsibility of NHS England or local authorities (specialised services, primary care, public health)

CCG Overview (2)

- West Sussex CCGs
 - current CCGs – Coastal West Sussex CCG, Crawley CCG, Horsham & Mid Sussex CCG
 - plan to merge to a single West Sussex CCG from 1 April
- Sussex Health and Care Strategic Delivery Plan
 - Response to NHS Long Term Plan (LTP)
 - Joint West Sussex Place Based Plan - integrated response to the Joint Health & Wellbeing Strategy and NHS LTP.
 - Describes our initial response and priorities with focus on prevention and developing integrated service
 - Next steps to engage further with partners and develop a more detailed delivery plan

Primary Care Services – access and provision (1)

- In response to the national shortage of GPs, practices have been diversifying their workforce in order to meet their patients clinical needs.
- The new national contract offered to GPs from July 2019 funding to support further additional skill mix, such as Clinical pharmacists and social prescribers.
- Practices have joined together into Primary Care Networks (PCNs). This will enable them to start working at scale where appropriate and integrate with other providers who share the care of their patients.
- 100% of our practices have signed up to this contract. Practices have been working to ensure that their patients are kept clinically safe, and have timely access to services by being triaged for clinically urgent conditions.

Primary Care Services – access and provision (2)

- In this way those with an urgent need to access a clinician can be seen by the practice's same day service. In order to ensure they meet the demand and have capacity for same day access, people who need a non-urgent routine appointment may can book these in advance often via on-line facilities as well as over the phone.
- The new social prescribing service has also proved beneficial to people living in Arun who need support to meet their non-clinical needs
- By coming together and taking an innovative approach they have delivered a new service working with partners to meet patient needs – for instance, one such new service is the first contact mental health practitioner in Primary care where practices can share this resource for the patient population in Regis.
- The new GP Improved Access service has been available in Arun since October 2018 which means that patients can access GP and nurse appointments until 8pm in the evenings and at the weekends. This has increased GP consultation time in Arun by around 9 hours a week.

Primary Care Premises, Developments & Plans

- CCG has supported a number of minor improvement grants at Park Surgery in Littlehampton, including two extensions completed in October 2016 and June 2019. This has enabled the practice to provide additional NHS services.
- As part of Housing planning, the CCG has responded to Arun Council's plans on a regular basis. The responses include plans for Estate where key housing growth is located
- For example – in Littlehampton, the review of current estate and services supports the Primary Care requirements in the proposed new Health Centre
- Other specific estate plans include New facility at Eastergate (The Croft) which is at Outline Business Case stage.

CCG strategic estate plan for Arun

- Summary of submitted CCG strategic plan in response to housing plan (submitted 2016 and annually commented on)

West to East proposals in line with Housing plans;

- Pagham / Bersted – to extend Grove House & review options for any additional need in line with housing delivery outcomes
- Bognor – Improved utilisation of Bognor Health Centre
- BEW (Eastergate) – New building at Croft site for a 20,000 list size premises. At Business Case stage and developer has a build timeline
- Ford/Yapton – following from Croft development either extend further (phase 2 is planned) or review Avisford and Yapton/Ford opportunity
- Littlehampton – incorporate Primary Care at the core of the new Health Centre and have services from Community and Mental Health
- Angmering – Willow Green and Coppice are working on a project to facilitate health care for the planned homes

Littlehampton, Bognor and Zachary Merton Hospital

- Littlehampton site - new and joint support from Arun Council (housing), Mental Health, Community Trust and Primary Care for a health hub
 - Site users have outline service specifications in place as part of the design phase
 - 'One Public Estate' team approach, driving the project and an opportunity with other site units being up for renewal. West Sussex County Council are leading on this project.
- Bognor Health Centre - no current plans to relocate
 - NHS Property Services are the landlord of the building and are actively seeking additional parties to locate alongside the GP practice in the Health Centre.
 - Plans for Improved Access to co-locate in future.
- There are no current plans to make changes in relation to the beds provided by Sussex Community Foundation Trust at Zachary Merton Hospital

Mental Health Services

- Significant investment over the past few years through the nationally mandated Mental Health Investment Standard
- Improvements in access to services, primary care mental health, liaison in acute hospitals, crisis and home treatment and community mental health services are planned or currently being implemented
- A consultation on proposals to improve the quality and safety of in-patient mental health services in West Sussex for adults, older people and those living with dementia commenced on Wednesday 17 July and ran for a 12 week period. Responses to the consultation have been independently analysed and final proposals developed.
- Pepperville House is one of a number of community bases provided by SPFT which enable service users to have access to group therapies and other treatment programmes. These are based across the whole of West Sussex and the CCG are not aware of any plans or changes to services from existing structure

Support following change in ability to communicate

WSHFT outpatient services:

- WSHT Worthing and St Richards Hospital Speech & Language Therapy (S<) outpatients provides ENT/Voice and Videofluoroscopy taking referrals from community/GPs/Joint ENT voice clinic and Maxillo facial
- If a patient lives in Arun they will be offered the choice of sites to access in terms of responsiveness and accessibility at that time

Community services:

- For up to 12 months post stroke Community Neuro Rehabilitation Team offer a service in patients homes. After this if a review is needed Community S< offer home based therapy
- Lifelong communication support group run by voluntary sector “Say Aphasia” in Goring. SCFT aim to call in 3 times per year as a support and they contact in-between if issues arise. SCFT direct patients to the group or they can join independently. Also a group in Hove people can access.
- Community S< patients in Chichester area are seen by the S< Team working from the Bognor Regis War Memorial Hospital. Those who have experienced a change would still be seen by the same team.
